

Yrd. Doç. Dr. Mustafa Ateş,

Ass. Prof.Dr Mustafa Ateş was born in Istanbul in 1977. He studied at Nişantaşı Anatolian High School between 1987-1995. He studied dentistry at Marmara University Faculty of Dentistry between 1995-2000. In 2008, he has completed his PhD with his thesis on 'Comparison of the methods used in the measurement of dimensional changes after rapid maxillary expansion'. Until May 2014, he was Ass. Prof.Dr in the Department of Orthodontics of Marmara University. In 2012, he has established Sarıyer Orthodontics Clinic with his wife, Orthodontist Aydan Coşkun Ateş. Areas of interest; digital orthodontic models are digital indirect bracketing, orthognathic surgery and skeletal anchorage methods.

Digital Evolution of an Orthodontic Clinic in Turkey

Digital evolution, which started with the acquisition of digital orthodontic models, has gained a new dimension by enabling the production of many treatment tools in clinical environment thanks to developments in software with oral scanners. Our aim; is to share our experience with our colleagues in our ongoing adventure with transparent plaque treatments and indirect digital bracketing, starting with the choice of in-house scanner in our clinic.
